Miguel Rocha

Software Engineer

WORK EXPERIENCE

University of Porto, Porto, Portugal — 2025 – Present

Information Systems Developer & Communications Assistant

- Developed and deployed an internal volunteer management portal to optimize data tracking and project coordination
- Designed and maintained custom web applications and tailored digital tools that automate internal workflows and improve performance
- Provided IT support and system administration, ensuring continuous availability of the unit's digital platforms and institutional content (CMS)

TreeTree2, Remote · Volunteer — 2025 – Present

Software Engineer

- Architected and built the entire front-end portal for Prisma: multi-tenant architecture, cross-domain SSO, an accessible WAI-ARIA-compliant theme system, and a DAG learning-path map (Sugiyama layout)
- Engineered an interactive form and evaluation engine with custom attempt lifecycles, real-time autosave, and per-attempt anti-cheat randomization
- Designing and building Folhas end-to-end — scalable data models, backend APIs, and frontend dashboard — plus an AI-powered scraping bot with human-in-the-loop validation
